

Stay Safe Online

I can tell my friends to stay safe online...

Make sure to change your password often and never give out personal information.

I can be alert and check sources while exploring online...

Make sure to check other sites and see if they are saying whatever information they are talking about is accurate.

I can define digital footprint and what it conveys to others...

Make sure to only post something online that you don't care stays because everything stays. It's a digital footprint.

I can identify how to avoid online tricks and scams

Avoid pop-ups because they may lead to accidentally giving out personal information and never trust emails that aren't real.
